

TEMS

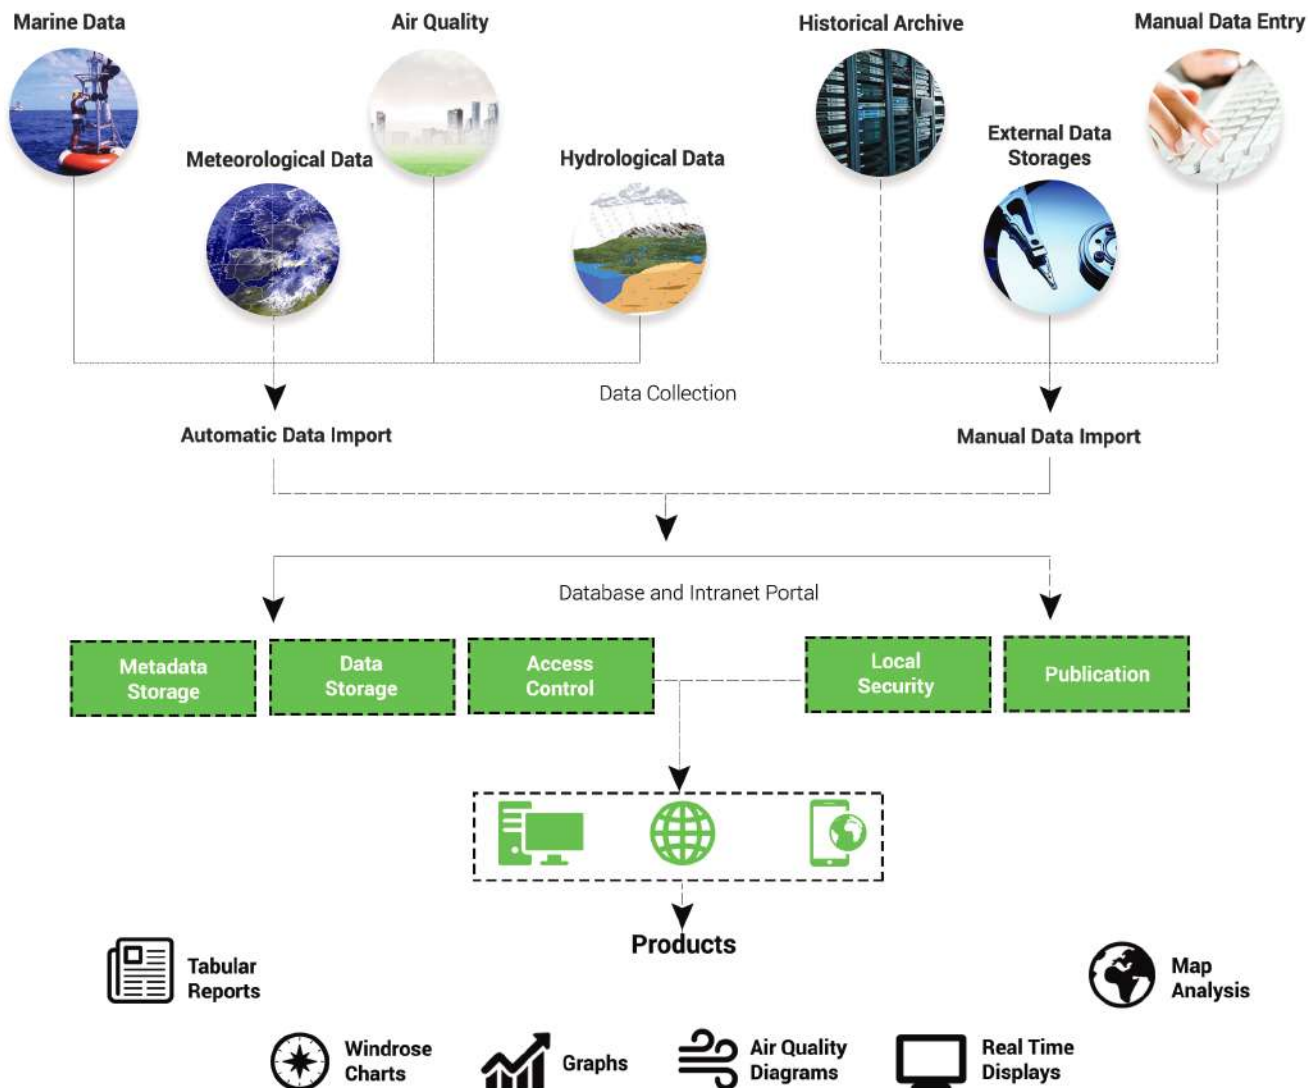

TRIDEL ENVIRONMENTAL MONITORING SYSTEM

TRIDEL ENVIRONMENTAL MONITORING SYSTEM

TEMS (Tridel Environmental Monitoring System) is a system for collecting, integrating, and processing meteorological, air quality, and water quality data. TEMS software is totally instrument and transmission independent and hence can be used flexibly and comprehensively within most applicable environments.

All your data is saved in a secured database system. Various dashboards are available to view and analyze the data. You can create time series plots, export data in different formats including word, excel, or pdf.

Mobile Application

FEATURES

- ▶ Real Time Data Display Dashboard.
- ▶ Interactive Maps.
- ▶ Secured Database.
- ▶ Data trends and graphs.
- ▶ QA/QC, Alerts & Data Validity.
- ▶ Archiving of Historical Data.
- ▶ Imports/Exports of Data. (Excel, CSV, PDF or Zip formats)
- ▶ Customized reports and Reporting Format.
- ▶ Remote Diagnostics & Maintenance Module.
- ▶ System Control Console.
- ▶ User authentication
- ▶ Customization

COMPREHENSIVE SUPPORT

We offer full support for the life of our products. You can depend on responsive service from our technical support team. We ensure that your system is maintained at a level that meets the most stringent standards of your compliance requirements. Tridel offers comprehensive services to help you get the most out of your system.

Full system installation, configuration and training by our certified technicians to ensure that the system is set up to meet your business needs with minimal effort on your part.

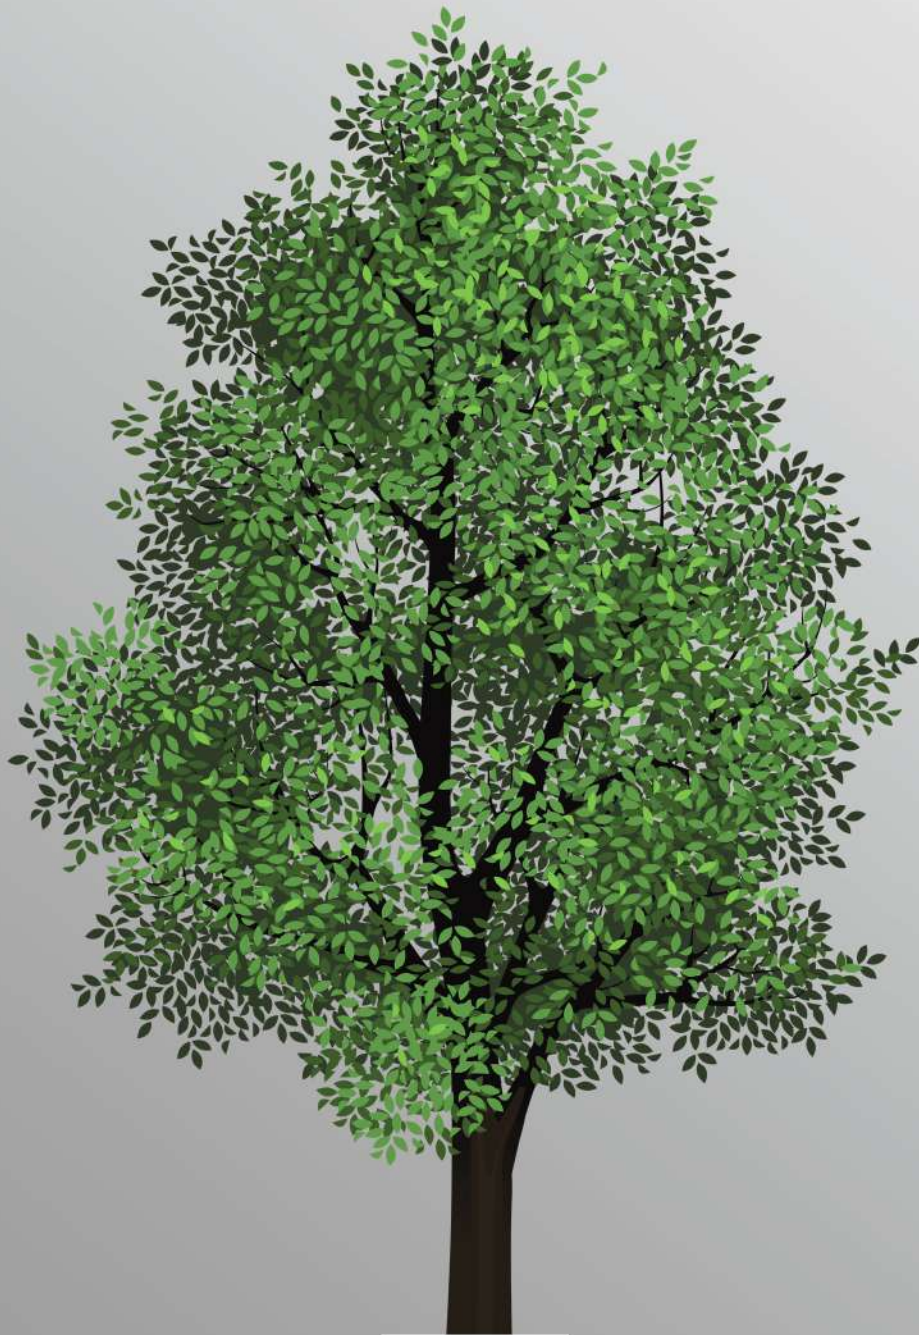

Extensive support plans that provide prioritized technical support by phone, email and web, and user training, access to eLearning content and free software upgrades.

Our team of engineers, meteorologists and technical support experts are committed to ensuring your system functions flawlessly for years.

- ☆ Onsite or remote support – worldwide
- ☆ User/Admin Training – onsite or remote
- ☆ Extended Warranties & prepaid Calibration Plans
